

Introducing Greenheck's eCAPS® Bridge for Seamless Workflow

We are pleased to advise you that Greenheck has created a valuable software tool for your use that will save you significant time when designing HVAC systems with Greenheck equipment. The tool is called the eCAPS Bridge for Revit and it results in quicker, easier access to Greenheck product content while working in Revit.

The eCAPS Bridge is an add-in that links Greenheck's eCAPS platform directly to the Autodesk® Revit program. It gives users access to the capabilities of eCAPS, and facilitates seamless loading of Revit content without leaving the Revit work environment. This add-in is free to download and use.

eCAPS® INTEGRATES WITH AUTODESK REVIT®

Greenheck's eCAPS® ecaps.greenheck.com is a free online product selection software that guides users to the right Greenheck HVAC equipment for their projects.

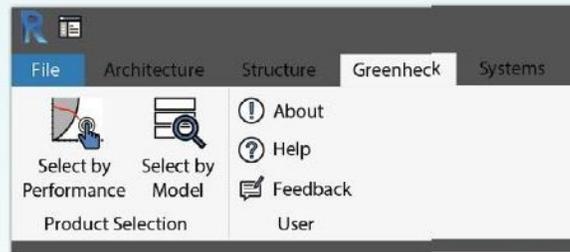

This integration allows users to make selections and directly insert or download Revit® content without leaving their Revit® projects. It allows product selection, configured (not generic) Revit models, and schedule data all within the Revit program. Initially, only fan selections can be made using the eCAPS Bridge; however, more Greenheck products will be added on a regular basis.

BENEFITS OF ECAPS® BRIDGE FOR REVIT®

- Streamlines workflows for designers and specifying engineers.

- Quick library access to Level of Development (LOD) 200 Revit® content.
- Product performance and electrical shared parameters for scheduling provided with LOD 300 Revit® content.
- Simplify product selection, system design and scheduling.

ONCE INSTALLED, A "GREENHECK" TAB WILL BE VISIBLE IN REVIT®.

USERS CAN SELECT PRODUCT REVIT® CONTENT BY PERFORMANCE OR USERS CAN SELECT PRODUCT REVIT® CONTENT BY MODEL NAME.
