

## ADE Now Represents Pyure!

ADE is excited to announce we have entered a new representative agreement with Pyure which gives us access to their wide variety of indoor air quality technology. Contact the ADE Team to learn more about these products.

Pyure's hydroxyl-generating technology has been used throughout the U. S. but most notably at Churchill Downs, KY to

reduce bacteria, mold and cigarette odors. Click the image below to learn more!

Want to learn more about the Pyure family of products? Please visit Pyure's website, contact our Engineering Quick Assist or your ADE Salesperson for more information.
