

ADE Now Represents Runtal!

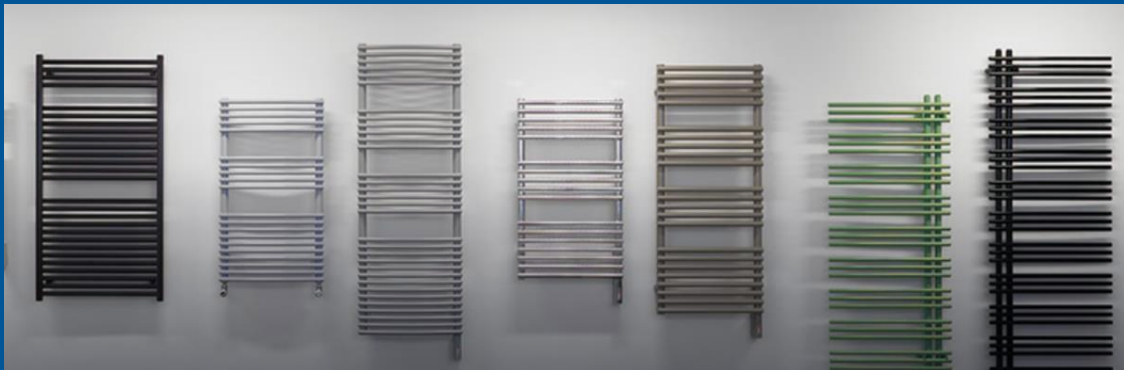

ADE is excited to announce we have entered a new representative agreement with Runtal! This gives us access to their wide variety of radiator technology. Runtal began production on their line of radiators in 1953 and have continued to add new and innovative products to their line since. Contact the ADE Team to learn more about these products.

Over 30 years ago, a major commitment was made to the US market with the opening of a state-of-the-art factory in Ward Hill, MA (Haverhill), where each handcrafted radiator is now produced for the North American markets.

Whether it is a small municipal retrofit project or complete greenfield building design, Runtal's design and application staff along with high-performance quality manufacturing combine to provide a unique comfortable and effective installation time after time.

Want to learn more about the Runtal family of products? Please visit Runtal's website, contact our Engineering Quick Assist or your ADE Salesperson for more information.
